ionic

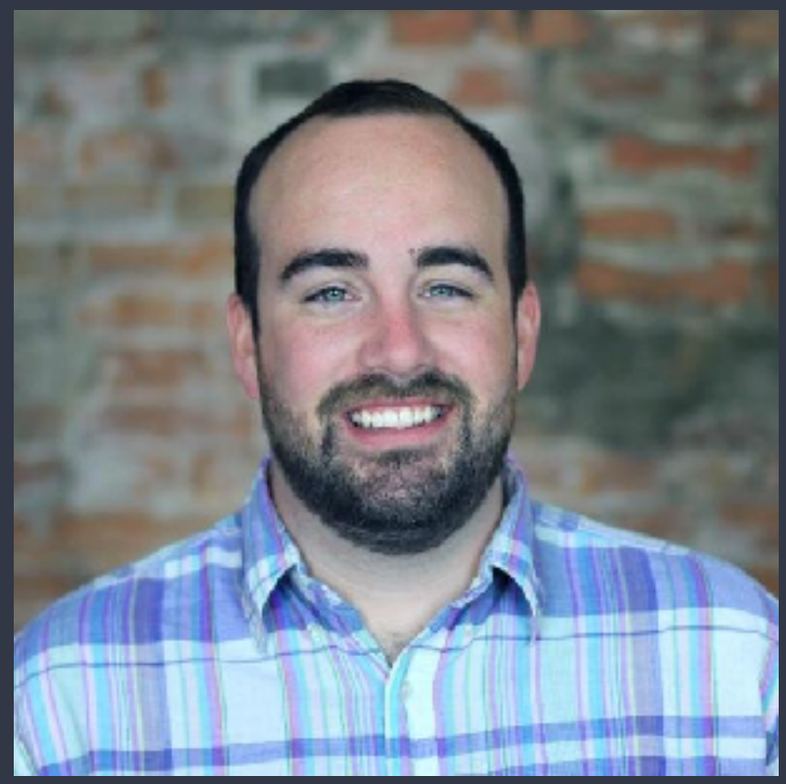
“Mobile App Development for Web Developers”

Building apps with Ionic and
AWS Mobile Hub

http://ionicframework.com/

About Me

- Co-founder, CEO of Ionic
- Based in Madison
- @maxlynch on Twitter
- Soccer, film photography nerd

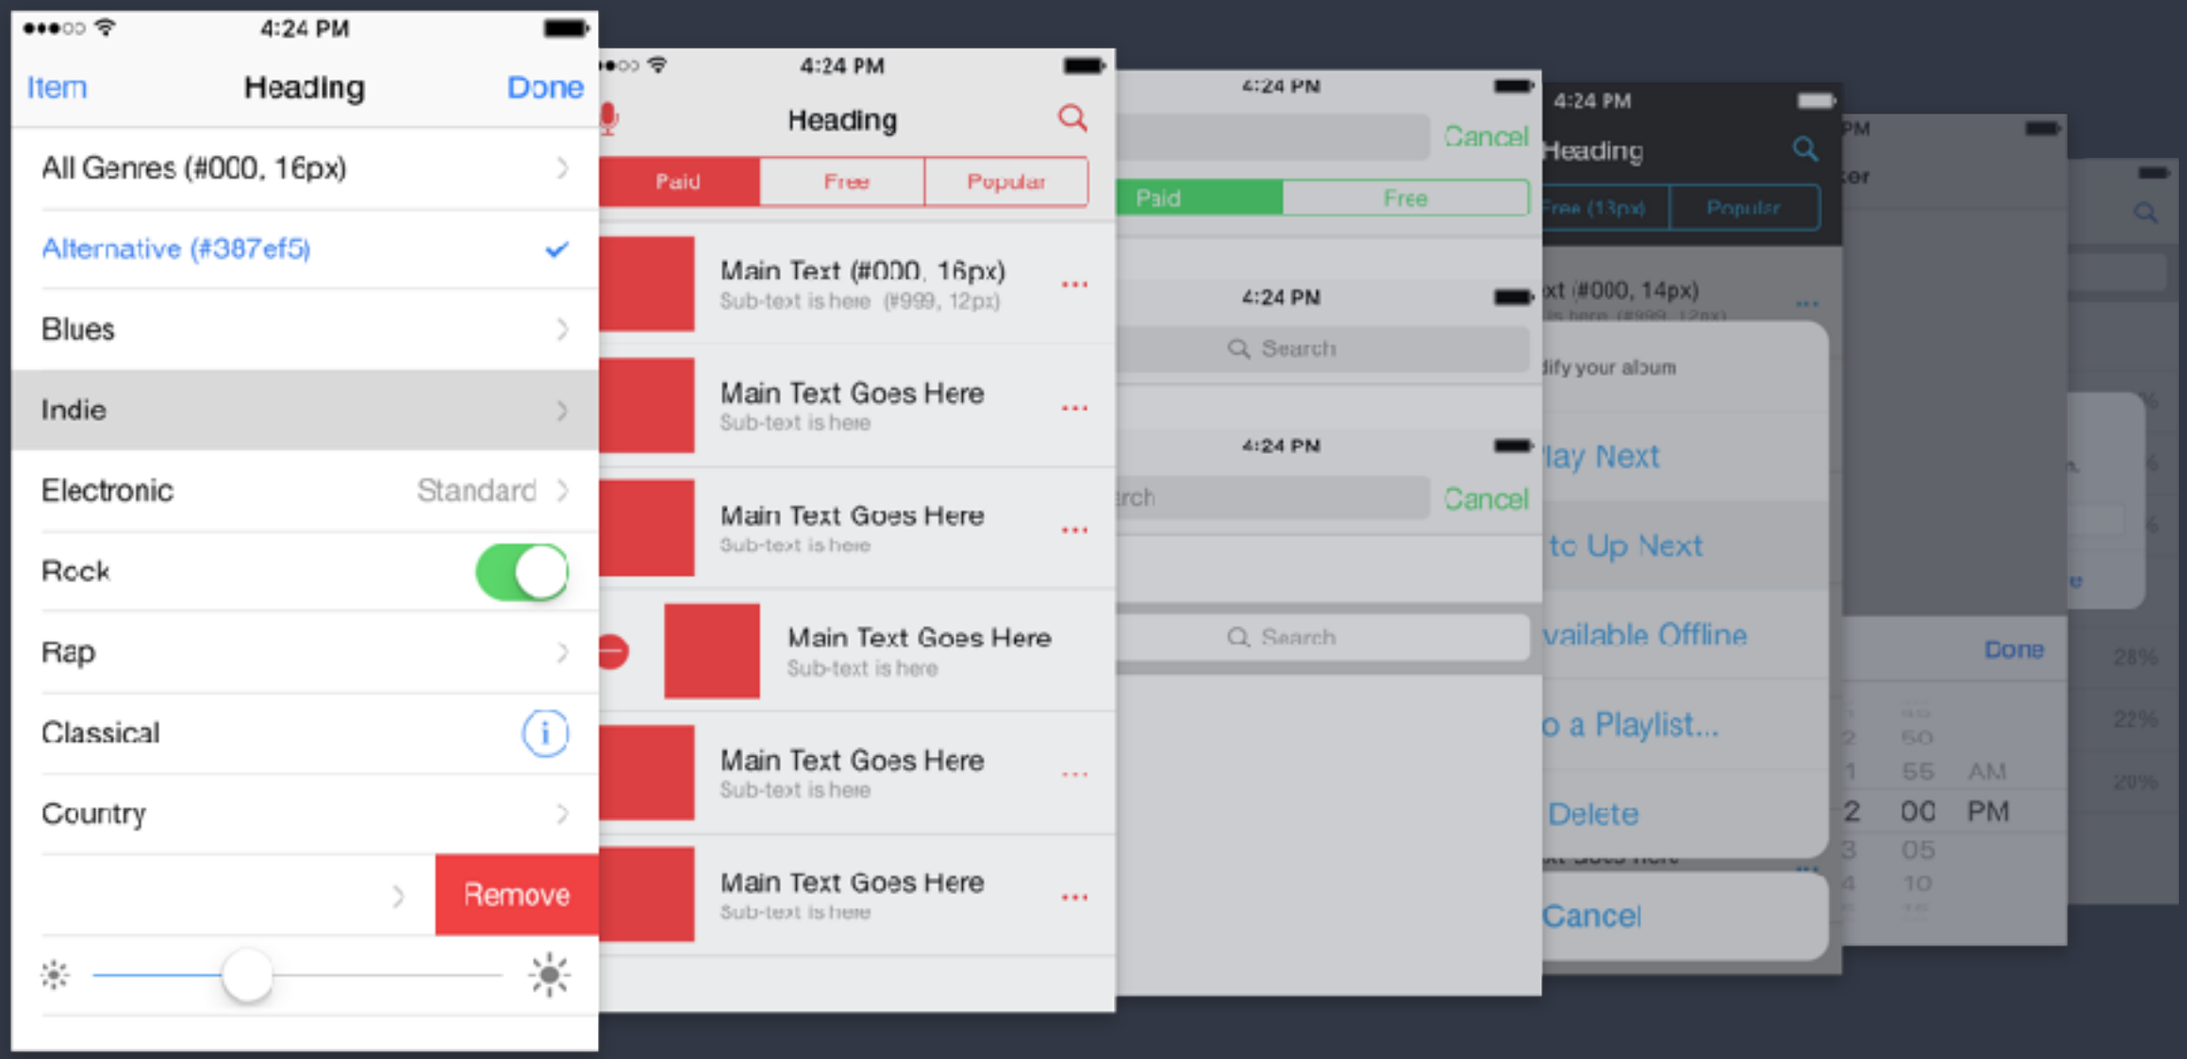


Agenda

- Introduction to Ionic Framework
- Introduction to AWS Mobile Hub
- Demo: Ionic + AWS Mobile Hub
- Beyond Ionic Framework

ionic

Ionic Framework



ionic

Ionic Framework

- “UI layer for web and mobile apps.”
- Built on HTML5, JavaScript, and CSS
- Goal: one codebase, many platforms
- Focused 100% on web developers
- Based on TypeScript, Angular, and (soon) framework agnostic web components
- Top 50 OSS project on GitHub (30,000 stars)

About

ionic

Ionic Components

Ionic Native Plugins

90+ plugins that make adding any **native functionality** dead simple

TOUCH ID

CAMERA

OAUTH

ionic

Ionic CLI

```
max@ionitron:~/git/ionic-conference-app$ ionic help

                 (_)       (_)
 _____  _____ _ __  _  ___
|_____||_____| '_ \| |/ __|
|_____||_____| | | | | (__
|_|\___/|_| |_|_| |_|\___|  CLI 3.3.0

Usage:

  $ ionic <command> [--help] [--verbose] [--quiet] [<args>] [options]
  $ ionic [--confirm] [--no-interactive] [--yarn] [--no-timeout]

Global Commands:

  docs ..................... Open the Ionic documentation website
  info ..................... Print system/environment info
  login .................... Login with your Ionic ID
  signup ................... Create an Ionic account
  start .................... Create a new project
  telemetry ................ Opt in and out of telemetry

Project Commands:

  generate ................. Generate pipes, components, pages, directives, providers, and
                             tabs (ionic-angular >= 3.0.0) (alias: g)
  link ..................... Connect your local app to Ionic
  serve .................... Start a local dev server for app dev/testing
  upload ................... Upload a new snapshot of your app
  cordova build ............ Build (prepare + compile) an Ionic project for a given platform
  cordova compile .......... Compile native platform code
  cordova emulate .......... Emulate an Ionic project on a simulator or emulator
  cordova platform ......... Manage Cordova platform targets
  cordova plugin ........... Manage Cordova plugins
  cordova prepare .......... Copies assets to Cordova platforms, preparing them for native
                             builds
  cordova resources ........ Automatically create icon and splash screen resources
  cordova run .............. Run an Ionic project on a connected device
  package build ............ Start a package build
  package download ......... Download your packaged app
  package info ............. Get info about a build
  package list ............. List your cloud builds
```

ionic

Real World Example

Installing Ionic

```
$ npm install -g ionic cordova
```

Note: Ionic requires Node and Cordova

Creating an App

```
$ ionic start chatsnap
$ cd chatsnap
```

Running an app

```
$ ionic serve
```

Running on device

```
$ ionic run ios[android]
```

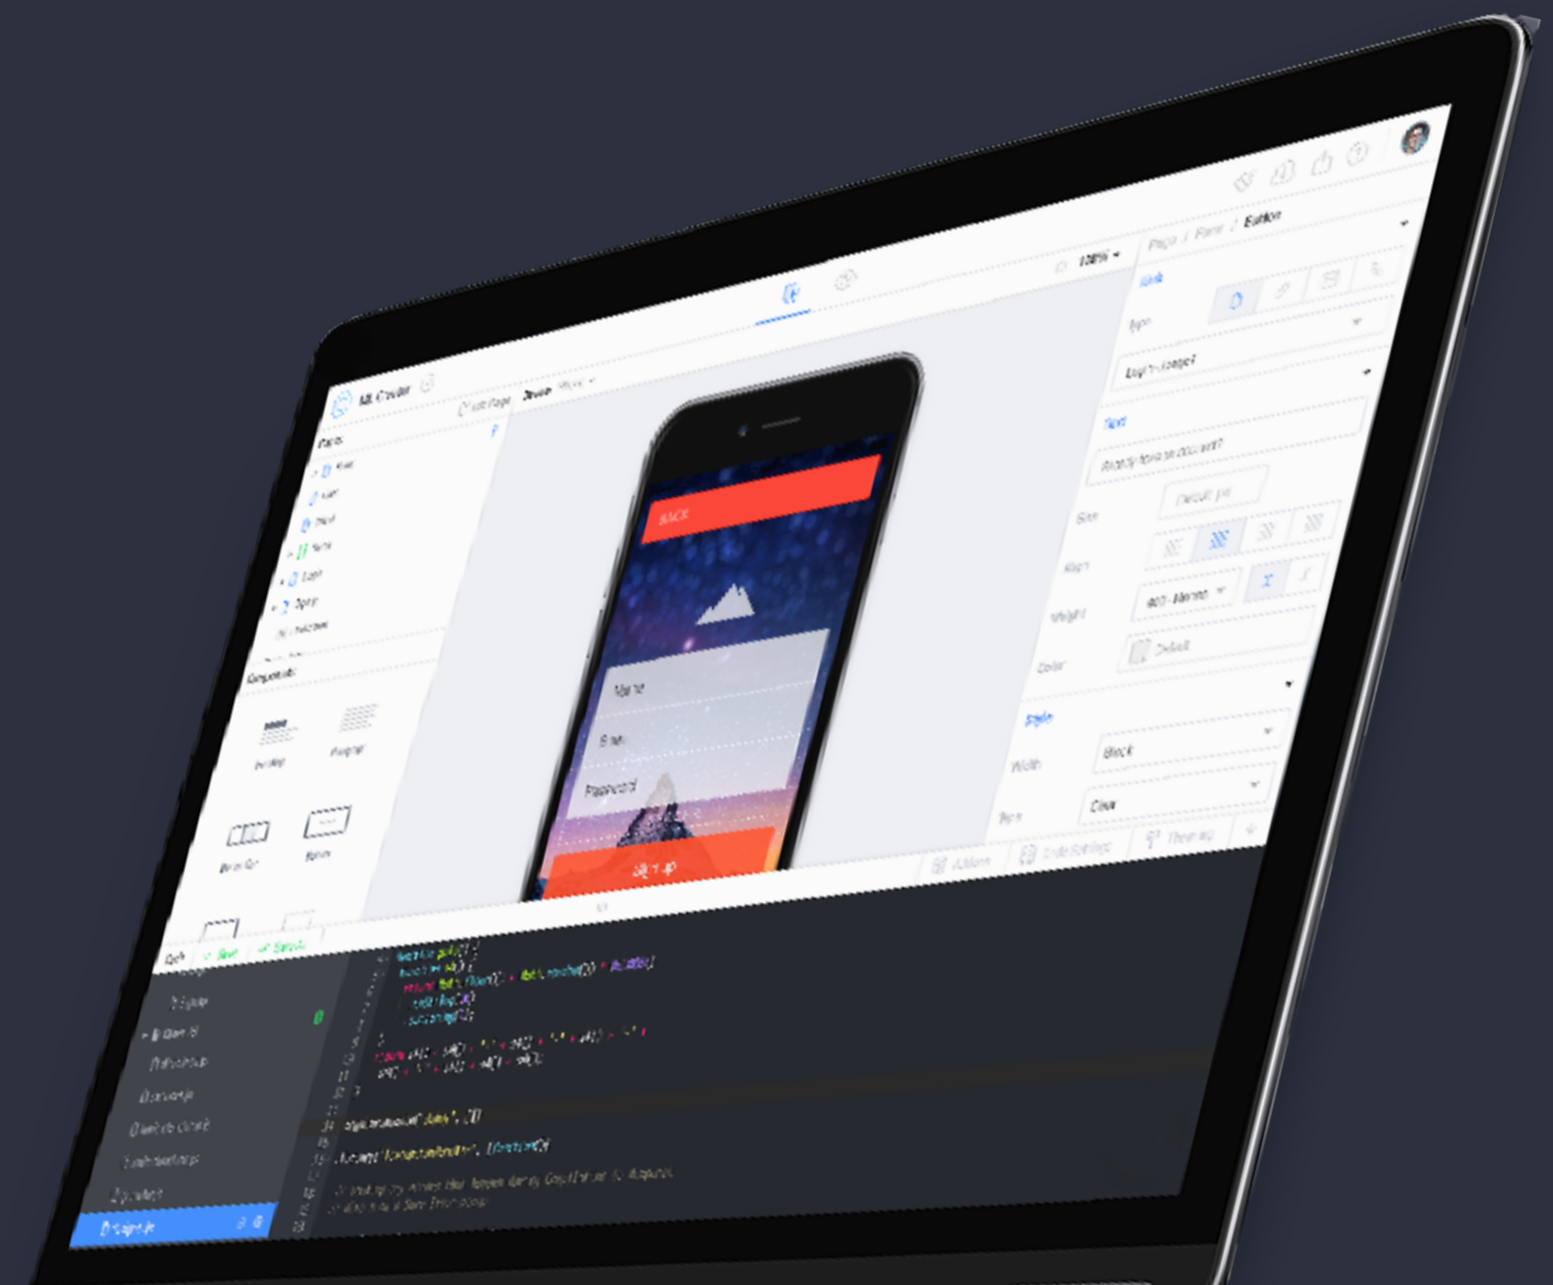
Ionic Pro Suite

A suite of powerful mobile development tools & services

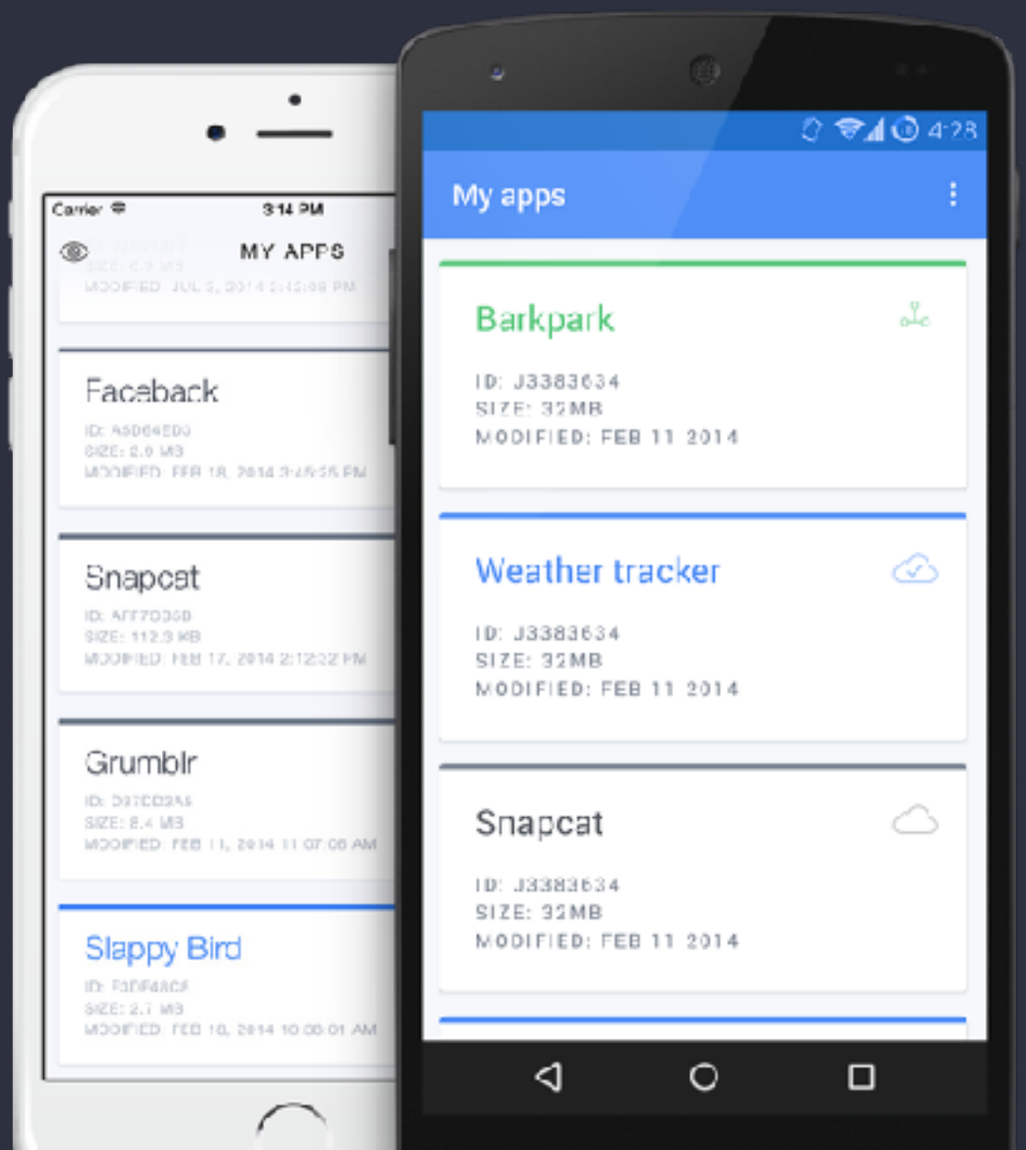
Prototype apps with Creator

A simple drag-and-drop prototyping tool for creating
real Ionic apps



ionicview

Share, test, and preview your apps, live on the device



What's Next

- First class support for desktop/PWA
- Integrated error reporting, Ionic Pro services
- Ionic Developer App
- Expanded demos and docs with AWS
- Stencil: a compiler for web components
